Join an Enriching “Advanced Education in General Dentistry” Residency Program

Seeking Candidates Now!

Twin Cities-based Apple Tree Dental's AEGD residency program, in collaboration with NYU Langone Health, is seeking candidates for our program beginning its fifth year in July 2022.

This highly-acclaimed and fully-accredited AEGD program offers two residents a one-year training opportunity based at our state-of-the-art Mounds View Center for Dental Health. Residents will gain valuable experiences with a large team of clinicians dedicated to serving patients with a broad spectrum of needs. In addition to general dentistry, our Mounds View Center also has an Advanced Dentistry Clinic where IV sedation procedures are provided in collaboration with nurse anesthetists.

Residents can expect to see a wide variety of patients of all ages, including those with special health care needs and access to care challenges. They will gain experience in all aspects of general dentistry, including restorative, fixed and removal prosthodontics, implant restoration, endodontics (including molars), and oral surgery (including third molar extractions). They will also treat patients under IV sedation in conjunction with faculty members. Individualized mentoring is provided by experienced, knowledgeable, and enthusiastic faculty dentists. This program also includes a strong didactic component developed by NYU Langone Health.
